RE : Inform to Stop manufacturing for 1st Generation of Sigma Series of AC Servo

1. Preface

The 1st generation of Sigma Series of AC Servo (here after referred as “Sigma 1”) had been released in 1992, and Sigma 1 was highly esteemed both domestic and Asian markets. Thus, the products keep leading position in world-servo-market. However, we recently faced difficulties to continue the production because of supply stop of major electronic parts used for the Servo and declined bookings.

2. Reasons for Production Stop

- (1) 17 Years have passed since its development, and major electronic parts were not produced. It faced difficulties to continue the production.
- (2) Individual system: It can be replaced with our new generation AC Servo namely, Sigma V.

To keep advantageous position in such market, we enforced function of Sigma 1 and announces release of upgrade products. The upgrade makes Sigma V replace to Sigma 1 with minor condition. Accordingly, we will cease production of Sigma 1 and Sigma V will take succeeding position of Sigma 1. To attack customers, who have been using Sigma 1, for replacement smoothly.

3. Date of Last Order

September 20, 2008

4. Date of Production Stop

November 20, 2008 (A new booking will not be accepted.)
